### \*ZANTE CURRANT

Bunches medium; berries small, seedless; skin thin; black; blue bloom. This is the variety producing the currant of commerce, under the name "Zante Currant," of which there are imported into the U. S. annually from Greece over 1,000,000 pounds.

This offers a great opportunity for the planters of the interior where this variety has been thoroughly tested and found adapted to our conditions. August.

## YUCCA TREE PROTECTORS

Our extremely long, hot and dry summers make it imperative for all fruit growers to shade the bodies of young trees the first season. The most efficient and valuable protectors are made from the Yucca Palm. Soak the bundles in water before using.
